SHAHNAWAZ HALSINGE

Computer Science Engineering Student • Software / Game Development

Maharashtra, India | Email: halsingeshahnwaz@gmail.com | Phone: +918149522853 | GitHub: github.com/shahnawaz007

PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering student and fresher with a Diploma in Computer Science and hands-on experience building web applications and Unity-based 2D games. Comfortable with Python, C#, JavaScript, FastAPI, MySQL, HTML/CSS, Git/GitHub, and Unity. Interested in software development and game development internships where I can apply problem-solving skills and grow through real-world projects.

EDUCATION

B.Tech in Computer Science Engineering
Dr. Babasaheb Ambedkar Technological University (DBATU), Lonere
Sandipani Technical Campus, Latur
Currently Pursuing

Diploma in Computer Science
MSBTE — NBS Polytechnic College, Ausa
Aggregate: 80.34% | Completed

TECHNICAL SKILLS

- **Languages:** C++, C#, Python, JavaScript, Java
- **Web:** HTML, CSS, JavaScript, React, Next.js
- **Backend:** FastAPI, Python, Jinja2
- **Database:** MySQL, SQL
- **Game Development:** Unity, Unity 2D/3D, C#, Input System, Physics, UI
- **Tools:** Git, GitHub, VS Code, Unity Editor, Android Studio

PROJECTS

Grocery Management / E-commerce Web App
FastAPI • Python • MySQL • Jinja2 • HTML/CSS/JavaScript
- Built a full-stack grocery application with product browsing, categories, cart, checkout, user profile, and admin management.
- Implemented backend APIs, database integration, authentication, product/category CRUD, orders, and customer ledger functionality.

Credits Management System
HTML • CSS • JavaScript • Backend/API • MySQL
- Developed a customer credit/ledger management system for recording customers, transactions, balances, and payment history.
- Designed practical management screens to organize customer financial records and improve day-to-day store operations.

2D Space Rocket Game
Unity • C#
- Created a 2D arcade-style game with player movement, physics, obstacles, scoring, and gameplay UI.
- Worked with Unity physics, collisions, camera behavior, and game-state logic.

2D Adventure: Robot Repair Game
Unity • C#
- Developed a 2D adventure prototype focused on exploration, interaction, obstacles, and repair-based gameplay.
- Implemented player controls, collision handling, UI, and gameplay mechanics in Unity.

AR Image Tracking Application
Unity • *AR*
- Created an AR image tracking application wherein you can scan an image to spawn a 3D model
- Integrates the joystick pack to allow movement of the spawned 3D model across the plane

ADDITIONAL STRENGTHS

- Problem solving and debugging
- Object-oriented programming fundamentals
- DSA fundamentals
- Responsive web development

• Teamwork and communication

CAREER INTEREST

Seeking an internship / entry-level opportunity in Software Development, Full-Stack Development, or Unity Game Development where I can contribute to real projects and strengthen my engineering skills.
